

Bone Structure Review

Across

2. process of lining up the broken ends of fractured bones

4. the inner lining of the diaphysis in a long bone

6. substance stored in the medullary cavity

10. type of fracture where bone breaks into three or more pieces

14. type of cell that builds bone

15. the space in bone that osteocytes occupy within an osteon

17. type of fracture that results from twisting

18. type of mineral stored in bone

19. type of callus formed right after the fibrocartilage callus is formed in bone repair

20. part of long bone where red bone marrow is located

Down

1. type of bone that is as long as it is wide

3. type of bone without spaces and found in diaphysis

5. type of disorder where bone density is lost

7. the category of bone that vertebrae in the back are an example of

8. a fracture resulting in a clean break

9. thing that is formed first in the steps of bone fracture repair

11. another name for a haversian system

12. another name for the shaft of a long bone

13. outer covering of the diaphysis of long bone

16. type of fracture where ends of bone pierce the skin
