

Name: _____

Building Blocks of Life

Across

- 2. Cells that do not contain organelles
- 7. Site where genetic material is stored
- 8. Network where chemicals are manufactured and processed
- 10. Where protein production occurs

- 11. partially permeable membrane surrounding the cell
- 12. The science of classifying and naming organisms

Down

- 1. Site of majority of cellular respiration
- 3. Small organelles that break down complex chemicals

- 4. distribution centre for chemical products
- 5. Its main role is to manufacture ribosomes
- 6. Term to describe all cells that contain organelles
- 9. Fluid that contains the organelles
