# Building Blocks of the Human Body

- |  |                           |
|--|---------------------------|
| 1. controls all body functions                                       | A. liver                  |
| 2. Controls Vision   | B. Skeletal               |
| 3. circulates the blood the  | C. intestines and stomach |
| 4. supply the blood with oxygen                                      | D. Excretory              |
| 5. digest food   | E. Respiratory            |
| 6. which removes the toxic byproducts of digestion                   | F. Eyes                   |
| 7. which eliminate water and waste products                          | G. muscular tissue        |
| 8. the body's largest organ  | H. Muscular               |
| 9. tissue that covers and protects body surfaces and internal organs | I. Endocrine              |
| 10. supports, protects and holds the body together                   | J. nerve tissue           |
| 11. coordinates body functions                                       | K. heart                  |
| 12. contracts, when stimulated, to produce motion                    | L. skin                   |
| 13. Provides framework of the body                                   | M. Circulatory            |
| 14. Moves the body   | N. kidneys                |
| 15. Circulates blood through the body                                | O. Digestive              |
| 16. Sends and receives body messages                                 | P. Integumentary          |
| 17. Supplies food to the body  | Q. Nervous                |
| 18. Eliminates waste from the body                                   | R. brain                  |
| 19. Controls breathing of the body                                   | S. lungs                  |
| 20. Controls growth and general health and reproduction of the body  | T. Reproductive           |
| 21. Allows living organisms to procreate                             | U. epithelial             |
| 22. Controls the sebaceous (oil) and sudoriferous (sweat) glands     | V. Connective Tissue      |
