

# Business Intelligence Play Time

## Across

3. SQL Injection (SQLi) refers to an injection attack wherein an attacker can execute malicious SQL statements that control a web application's database server

5. A \_\_\_\_\_ is a special kind of a stored procedure that executes in response to certain action on the table like insertion, deletion or updation of data.

7. \_\_\_\_\_ is a set of programming extensions from Sybase and Microsoft that add several features to the Structured Query Language (SQL) including transaction control, exception and error handling, row processing, and declared variables.

9. \_\_\_\_\_ statements are used to define the database structure or schema.

10. a collection of information that is organized so that it can be easily accessed, managed and updated.

## Down

1. A \_\_\_\_\_ is a set of Structured Query Language (SQL) statements with an assigned name, which are stored in a relational database management system as a group, so it can be reused and shared by multiple programs.

2. \_\_\_\_\_ statements are used for managing data within schema objects.

4. A \_\_\_\_\_ clause is used to combine rows from two or more tables, based on a related column between them

6. In SQL, the \_\_\_\_\_ TABLE statement is a Data Definition Language (DDL) operation that marks the extents of a table for deallocation

8. a request for information from a database.
