

Name: _____

Date: _____

C4L2

Across

- 5. the offspring doesn't always have the same trait
- 6. shows inherited genetic traits in a family tree
- 7. 2 recessive alleles that are the same
- 9. 2 dominant alleles that are the same
- 10. it only takes 1 X chromosome for a male to show the recessive phenotype

Down

- 1. several genes control the phenotype of a trait
- 2. X or Y
- 3. 2 alleles that are different (Tt)
- 4. always produce offspring with same trait
- 8. chart that shows all possible outcomes of a genetic cross and the probability of those outcomes
