

# C4L2 Understanding Inheritance

## Across

2. rr
6. TT
7. height and skin color in humans.
8. Rr
9. a chromosome involved with determining the sex of an organism, typically one of two kinds.
10. RR

## Down

1. since males only have one X chromosome, it only takes one recessive allele on his X chromosome to show a recessive phenotype.
3. Tt
4. chart that shows all possible outcomes of a genetic cross and the probability of those outcomes.
5. shows inherited genetic traits in a family tree.
