

# CELL CROSSWORD

## Across

2. A relatively stable equilibrium between interdependent elements.

3. An cell that contains a nucleus and that is multi-cellular and mostly found in plant or animal cells.

6. Is present within the cell membrane and contains all organelles (helps fill out the cell and helps keep organelles in their place)..

8. A plastid that contains chlorophyll and in which photosynthesis takes place.

9. A cell that includes no nucleus , no organelle and is unicellular.....(ex) bacteria.

11. Something that's designed to keep unwanted or wanted things in or out ?

13. Is a group of membranous within the cytoplasm in a eukaryotic cell.

14. The production of offspring by a sexual or asexual process.

15. What is the basic unit of life?

## Down

1. Is a central organelle of the eukaryotic , and contains most of the cell's DNA.

4. Only allow things to stay in or out.

5. Is an organelle in a cytoplasm of a eukaryotic cell containing degradative enzymes.

7. Is an organelle found in large numbers in most cells, in which the biochemical processes of respiration and energy production.

10. Organisms that are living.

12. Organisms that are non-living.
