

CNS cells

Across

3. Structures that provide energy for the cell

6. Cell body

10. Axoplasmic transport occurs using what structures?

12. The substance release from the end of a neuron

14. Long projection from the cell body of a neuron

15. Gelatinous fluid inside of a cell

16. The process of cell digestion of dead cells

Down

1. Cells forming myelin in the PNS

2. The process of release of neurotransmitters

4. The cell that forms myelin in the CNS

5. The manager of a cell

7. Treelike projections from the cell body

8. Name of fatty covering on axon that insulates the electrical impulse.

9. Supporting cells of the CNS

11. Ending of a neuron

13. Space between one neuron and the next
