

# CS: Nervous System and Psychiatry

## Across

1. X-ray of blood vessels in the brain after the intracarotid injection of contrast medium
3. Benign tumor of the coverings of the brain (the meninges)
10. Cerebrovascular accident
12. Use of a microscope to dissect minute structure during surgery
13. Polysomnography
15. Computed Tomography
16. Seasonal affective disorder
17. Single-photon emission computed tomography
18. Drugs used to treat psychosis, especially schizophrenia

## Word Bank

CT	CVA	Behavioral therapy	Phren/o	Cerebral Thrombosis
Gyri	Gnos/o	DTR	Cognitive Therapy	Sulci
SPECT	Hemiplegia	Cerebral angiogram	Microsurgery	Plegia
TIA	Gangli/o	Encephalitis	Myelitis	Cerebral arteriosclerosis
Neuroleptic Agents	Meningioma	SAD	Quadriplegia	Discectomy
Persecutory delusion	PSG	Paraplegia	Nuclear medicine imaging	Astereognosis

21. Treatment to decrease or stop unwanted behavior

23. Knowing

24. Mind

26. Shallow groves that separate gyri

27. Convulsions (mounds) of the cerebral hemispheres

28. Treatment to change unwanted patterns of thinking

29. Removal of a herniated disc

30. Presence of a stationary clot in a blood vessel of the brain

## Down

2. Hardening of the arteries of the brain

4. Paralysis on one side of the body

5. Radionuclide organ imaging

6. Deep Tendon Reflexes

7. Paralysis

8. Ganglion (knot)

9. A person's false belief that he or she possesses great wealth, intelligence, or power

11. Paralysis from the waist down

14. Inability to judge the form of an object by touch (e.g. a going from a key)

19. Transient ischemic attack

20. Inflammation of the spinal cord

22. Inflammation of the brain

25. Paralysis of all four limbs
