

# Can You Find Your STEM Career?

## Across

- 4.** A person who uses computers to gain unauthorized access to data
- 6.** A scientist trained in the study of chemistry
- 8.** An engineer that solves agricultural problems
- 9.** A person that finds trends in data sets and developing algorithms to help make raw data more useful
- 10.** A person that cares for individuals, families, and communities so they maintain optimal health

**12.** A person that has engineering duties to design, construct, and test aircraft

**13.** A person that studies the chemical and physical principles of living things and biological processes

## Down

**1.** An engineer that focuses on how to design, integrate, and manage complex systems

**2.** An engineer that combines physics and math with materials to design, analyze, and maintain mechanical systems

**3.** A person that uses scientific methods, processes, algorithms and systems

**5.** A person that uses principles to the design, development, maintenance, testing, and evaluation of computer software

**7.** A licensed health professional who maintain and restore human health through the practice of medicine

**11.** The person that operates and controls an aircraft
