

# Cardiac Review

## Across

3. Can cause a shortened QT interval  
 6. Vegetation on the valves  
 10. ST elevation in leads V3, V4 and sometime V2 is an \_\_\_\_\_ infarct  
 11. The T wave is the \_\_\_\_\_ of the ventricles  
 13. Longer, longer, drop...now you have a \_\_\_\_\_  
 15. Fast, irregular, non-life sustaining rhythm  
 16. Sustained HR >150

18. The ability to respond to an impulse  
 21. Untreated hyperkalemia can lead to \_\_\_\_\_  
 22. Dropped beat with a consistent PR interval, \_\_\_\_\_ Degree Type \_\_\_\_\_ (2 words)  
 23. Unshockable rhythm

## Down

1. Cardiac marker released into the blood with injury  
 2. Treatment for symptomatic bradycardia  
 4. Anti-Platelet Medication  
 5. Medication given for SVT

7. Non-pharmacological treatment for SVT  
 8. PVCs are \_\_\_\_\_ and bizarre  
 9. Chest pain relieved by sitting forward  
 12. Examines valves, heart function and ejection fraction  
 14. Most common dysrhythmia after a CABG  
 17. No relationship between the P wave and QRS (2 words)  
 19. May happen after a cardiac cath  
 20. ST elevation in leads II, III and aVF is an \_\_\_\_\_ infarct
