

Carl Jung

Across

3. When an individual relates more to his/her inner world.

8. "The patient influences the analyst unconsciously" refers to:

11. The figure of a man at work in a woman's psyche

12. Blocks to consciousness.

14. Stories of archetypal encounters.

15. The two irrational functions of consciousness are intuition and ___

16. Specialised learning mechanisms that organise our experiences.

17. A shared species-specific unconscious we are all born with.

Down

1. A process of dreaming with open eyes.

2. The inner figure of woman held by man.

4. The first stage of therapy.

5. The goal of therapy.

6. Part of the unconscious which contains repressed memories and those that either lost or never gained full intensity to stay within consciousness.

7. The central archetype and totality of the personality.

9. Centre of consciousness.

10. Found within the unconscious, those parts of ourselves we don't like, don't know, or don't want to know.

13. When an individual relates more to his/her outer world.
