

Name: _____

Cell Biology

Across

- 7. the site where proteins are made
- 9. group of the same cells working to perform a function...
- 10. contains digestive enzymes
- 11. synthesises and processes lipids
- 12. regulates the movement of substances into and out of the cell

13. fungal cell wall is made of ...

14. when eukaryotic cells carry out a specific function they become...

15. rigid structure found in plant, algal and fungal cells

Down

1. folds and processes proteins

2. plant cell wall is made of ...

3. Is a single celled organism that lacks a nucleus

4. contains chromosomes

5. animal, plant, algae and fungi are...

6. found in plant and algal cells, site for photosynthesis

8. animal cells don't have this to maintain cell pressure
