# Cell Organelles/Prokaryote, Eukaryote Cells

## Across

- 8. Site of photosynthesis in plant cells
- 9. What stores fluid and materials in cell?
- 11. Organelle that controls all cell functions
- 13. Small granule found on endoplasmic reticulum

## Down

- 1. Site of protein synthesis
- 2. membrane surrounding nucleus
- 3. network of filaments that make up cytoskeleton
- 4. Complex cells with formed nucleus

- 5. Region of cell outside nucleus
- 6. Site where ribosomes are made
- 7. Produces usable form of energy for the cell
- 10. Type of eukaryotic cell
- 12. Packages protein for transport out of cell
