

Cell Organelles

Across

- 2. Type of cell with chloroplasts and a cell wall
- 5. Helps transport proteins out of the nucleus
- 7. Removes waste from the cell
- 9. Makes protein within the cell

- 10. Performs photosynthesis in plant cells
- 11. Powerhouse of the cell, makes energy
- 12. Makes ribosomes inside the nucleus of a cell
- 13. Controls what enters and leaves the cell

Down

- 1. Holds organelles in place
- 3. Stores food within a cell
- 4. Controls all of the cell's activities
- 6. A protein that carries genetic information
- 8. Shapes and supports the plant cell
