

Name: _____

Date: _____

Cell Organelles

Across

- 2. has ATP energy, makes things through CR
- 3. makes glucose in a process called photosynthesis {only in plant cells}
- 5. selects things in or out of the cell; protection for cells

- 6. vesicle that transports digestive juices to break down dead or foreign objects {only in plant cells}
- 7. found in nucleus
- 9. it is a storage place
- 10. makes protein
- 11. jelly like substance in a cell
- 12. packages & transports

Down

- 1. process molecules; if has ribosomes it does the folding of the proteins. if it has a smooth ER, it detoxifies & makes lipids
- 4. it is protection {only in plant cells}
- 8. holds a genetic material
