

Cell Organelles and Their Functions

Across

- 4.** Makes photosynthesis.
6. Makes ribosomes.
8. Transports materials through the cell.
9. Controls what materials enter and leave the cell.
10. Makes proteins.

Cell Wall
 Chloroplast
 Nucleolus
 Lysosomes

Ribosomes
 Endoplasmic Reticulum
 Golgi
 Mitochondria

Nucleus
 Cell Membrane
 Vacuole

- 11.** Packages materials for export.

Down

- 1.** Contains digestive enzymes.
2. Stores materials.
3. Gives support to plant cells.
5. Converts food into ATP.
7. Controls cells activities and contains DNA.
