

# Cell Organelles

## Across

- 3. packages different materials in and out the cell
- 8. where photosynthesis occurs
- 9. is the store house for genetic information
- 10. the power house in a cell

## Down

- 1. makes only lipids
- 2. makes proteins
- 4. the jelly that holds the organelles that suspend in them
- 5. the outer part of a cell
- 6. is used for storage in a cell
- 7. makes lipids and proteins
