

Name: _____

Date: _____

Cell Organelles

Across

- 5. Make protein molecules
- 8. Provide support and structure in plant cells, composed of cellulose
- 9. Network of channels within the cytoplasm, move materials from place to place
- 11. Contain chlorophyll, site of photosynthesis

Down

- 1. In the nucleus, it's the genetic material containing DNA

- 2. The fluid "filling" inside the cell membrane but outside the nucleus
- 3. Outer boundary that allows only certain materials to move in and out of cell
- 4. Control center of the cell
- 6. Packing of protein and other cell products to ship out of cell
- 7. Stores food, water, and waste
- 10. Bean - shaped structure that provides energy "Powerhouse"
