

Cell Project Crossword puzzle

Across

3. What assembles the proteins?
7. What contains the assembly of ribosomes?
10. What releases energy from stored food molecules?
11. What is a strong support layer around the cell membrane?
13. What controls many of the cell activities?

Down

1. What breaks down Lipids, Carbohydrates and Proteins into particles that are usable?
2. What assembles cell membrane and modifies some proteins?
4. Something that regulates what enters and leaves a cell?
5. What helps to organize cell division?

6. What stores enzymes attach carbohydrates and lipids to proteins?
8. What uses the energy from sunlight to make energy-rich food molecules?
9. What contains the important structures of the cell?
12. What stores materials such as water, salts, proteins and carbohydrates?

Word Bank

Ribosome	Endoplasmic Reticulum	Centrioles	Cell membrane
Nucleolus	Chloroplasts	Cytoplasm	Lysosome
Golgi Apparatus	Mitochondria	Nucleus	Cell wall
Vacuole
