

Cell Specialisation and The Microscope

Across

5. The organelle whereby cellular respiration takes place (13)

6. The microscope stands on its _____ (4)

9. Name given to an organism with many cells (13)

10. Characteristic; quality (7)

Down

1. The lens or lenses closest to the eye (8)

2. The lens in a microscope closest to the object observed (9,4)

3. The organelle whereby photosynthesis takes place (10)

4. Groups of cells of the same type (7)

7. The mechanism on which the specimen is placed (5)

8. The organelle which controls all cellular metabolic processes (7)
