

Cell Structures

Across

- 5. "Stores waste"
- 6. the "power house"
- 7. cells that have not yet differentiated
- 8. protein producing organelles
- 9. specialized structure only found in plant cells that allows photosynthesis
- 10. Control center that houses genetic material

Down

- 1. Genetic Material which codes for all life
- 2. cell that composes muscles, complete with many mitochondria and myofibrils
- 3. A male sex cell in many in many sexually reproducing organisms
- 4. a membrane-bound specialized structures in a cell that carries out the cell's internal processes
