

Cell Tissue

Across

- 3. Carries out specific activities necessary for the cell's health, like growth
- 5. Supports tissue of blood vessels and hollow internal organs
- 13. Hollow cylinders composed of proteins
- 14. Stores nutrients in cells
- 16. a female germ cell in the process of development
- 17. Storage for products, fat droplets, dust, bacteria, viruses, and never enclosed

- 18. the lining on body cavities
- 19. sub unit of two types of filaments

Down

- 1. Thick, Tough, Insoluble protein fibers that give shape and physical support to cell
- 2. transports gases
- 4. the main component of thin filaments.
- 6. helps connects body parts to one another
- 7. Allows small molecules to pass from cell to cell.

- 8. consist mainly of collagen, connects dense connective tissue.

- 9. hold cells together to prevent them from spreading
- 10. Fights disease for in the cell
- 11. the largest cytoskeletal filaments in cells
- 12. Thick liquid that is inside organisms
- 15. short hairlike processes or scattered bumps on cell surface
