# Cells

## Across

2. I manufacture the proteins for the cell.
3. I control what goes in and out of the cell.
5. I digest the old cell parts and microorganisms leftover from the cell.
7. I generate the energy for the cell.
8. I help the ER package and secrete proteins.
9. I look like a churro, and I am only found in animal cells.

## Word Bank

Centrioles  
Lysosomes  
Ribosome  
Cytoplasm

Cell Membrane  
Chloroplasts  
Vacuole

Golgi Apparatus  
Mitochondria  
Endoplasmic Reticulum

10. We help plant cells achieve photosynthesis, giving them food and turning plants green.

## Down

1. I package the proteins so that the organelles can do what their supposed to.
4. I hold all of the organelles in place, and keep them in the cell.
6. I store water so that the plant cells aren't thirsty.
