

# Cells

## Across

2. Little organs within the cell  
 5. Paramecium is a unicellular ciliated protozoan.  
 8. Living thing  
 11. gets energy for the sunlight and feeds the cells  
 12. Basic unit of life  
 15. Control center of the cell  
 19. a thin membrane around the cytoplasm of a cell  
 20. Of cells, having particular functions in a multicellular organism

## Word Bank

Organ System	Amoeba	Cytoplasmic Streaming	Englena	Volvox
Specialized	Cytoplasm	Chloroplasts	Chlorophyll	Cilia
Organs	Organelles	Flagellum	Cell Membrane	Organism
Protists	Nucleus	Tissues	Paramecium	Cell
Mitochondria	Cell Wall	Vacuoles		

21. is a type of cell or organism  
 22. group of tissues that work together to perform closely related functions  
 23. transports nutrients, enzymes
- ## Down
1. Stores food, water, wastes, and other materials  
 3. Green pigment  
 4. Powerhouse of the cell  
 6. A cell structure that controls which substances can enter or leave the cell.  
 7. Single celled organisms

9. the material or protoplasm within a living cell, excluding the nucleus.  
 10. Groups of cells with a common structure and function.  
 13. Found in the fresh and salt water  
 14. A group of organs that work together to perform body functions.  
 16. Small hair-like structures used for movement or sensing things  
 17. lives in colonies, autotroph, has flagella for movement  
 18. A long cellular appendage specialized for locomotion.
