

Cells Cells & More Cells

Across

- 2.** a complex of vesicles and folded membranes within the cytoplasm of most eukaryotic cells
- 5.** membrane bound structure that contains the cells hereditary information
- 11.** unicellular organism
- 13.** sacs of enzymes that digest food,water,and waste
- 14.** extensive network of membranes comosed of both regions of ribosomes

15. line the surface of certain cells and beat in rhythmic waves

Down

- 1.** a slender threadlike structure; especially microscopic appendage that enables many protozoa
- 3.** multi cellular organism
- 4.** the outermost covering of a cell that protects the cell
- 6.** a type of plastid that contains chlorophyll which is where photosynthesis takes place

7. a gel-like substance inside the cell that contains all the cell parts

- 8.** tiny structures bound by a membrane that contains enzymes
- 9.** often known as the "powerhouse" of the cell
- 10.** any of a number of organized or specialized structures within a living cell
- 12.** basic building block
