

Cells & Organelles

Across

3. Produces energy

6. Ridged outer layer of a plant cell

9. Tiny stands inside the nucleus

11. Control center of a cell

12. Uses chemicals to break down food

13. Create proteins

Down

1. Stores food, water, wastes, and other materials

2. Carry proteins and other materials

4. What comes in and out of a cell

5. Receives proteins

7. Gel-like Fluid

8. Captures Energy from the sunlight

10. Found inside the Nucleus
