

Cells Structure and Functions Vocabulary Terms

Across

- 4.** cell with a nucleus and other internal membranes that make up various organelles
8. A small part that carries out a specific job in a cell
9. An organelle containing digestive enzymes
10. Small structures in the cytoplasm that do special jobs
12. stack of membranes in the cell that modifies, sorts, and packages proteins from the endoplasmic reticulum

14. A thin membrane around the cytoplasm of a cell

15. A part of the cell containing DNA and RNA and responsible for growth and reproduction

Down

- 1.** Plastid containing chlorophyll and other pigments
2. An organelle containing enzymes responsible for producing energy
3. region where ribosomes are made, located in the nucleus

5. Having cells that lack membrane-bound nuclei

6. They store things in the cell

7. A thin membrane around the cytoplasm of a cell

11. Make proteins

13. All living things are made up of
