

Cells and Organelles

Across

- 2. supplies energy to the cell
- 4. forms proteins
- 5. cells without a nucleus
- 7. the basic unit of life
- 9. gives shape and protection to a plant cell

10. 2 types smooth and rough

12. processes and packages proteins

13. hairs on cells that help them move

14. cells with a nucleus

15. digest and break down what enters the cell

Down

- 1. outside layer of a cell
- 3. found in cells
- 6. the brain of the cell
- 8. carries out photosynthesis in a plant cell
- 11. holds organelles and gives the cell shape
