

Chemical Engineering

Across

1. Extremely small substances
5. The SI unit of temperature
7. An aberration for an outside meter
11. A widely used dimensionless plot
12. The direction of which a pipes axis
13. A symbol to represent
14. A natural material that seperates liquids

15. A symbol that reперesents the square root of -1
16. A wide shallow body of water
17. The gradual reduction
19. When a soft material is forced under pressure
20. A branch of mathematics that deals with the differentiation

Down

2. Making plastics and Resins

3. An additon of a process materials
4. A reaction of oxygen and chemicals to make other chemicals is?
6. the mathematical process of changing a algebraic expression into a sum
8. What is it all about
9. A prefix to denote a scale
10. A majoprocess for the synthies of ammonia
18. The undesired materials that are associated with ore
