

Chemicals of Life

Across

- 3. Large and complex molecules made of chains of smaller molecules.
- 6. Chains of nucleotides.
- 7. It can't desolve in water.
- 8. It has the ability to dissolve molecules.
- 9. A type of carbohydrate.

- 10. Chains of folded amino acids.

Down

- 1. It's the chemistry of a cell.
- 2. A group of molecules that makes Nucleic Acid.
- 4. It stores energy which then can be released in cells.
- 5. It serves as a building block for proteins.
