

# Chemistry

## Across

3. The center of atom, composed of protons and neutrons.

5. Atoms of the same elements with different number of neutrons.

6. Atomic number equals the number of

10. positively charged subatomic particles

11. What element has 16 protons?

12. matter made up of kind of atom

## Down

1. The space electron travel around in atom

2. Subatomic particle with no charge

4. Negatively charge subatomic particles

7. Atomic Mass Number = the protons +

8. What element has 20 neutrons in the nucleus?

9. Which element has no neutrons in its nucleus?
