

# Chemistry Review

## Across

1. Examples of compounds
2. Physical combinations of matter
7. Elements, compounds, and mixtures
12. Inside the atom where protons and neutrons are found
15. Positively charged particles

16. Represents compounds

17. Identifies an element and equals the number of protons

## Down

3. Represents the number of protons and neutrons of an atom
4. Two or more elements chemically combined
5. The smallest part of an element

6. Examples of elements

8. Examples of Mixtures

9. neutrally charged particles

10. Matter made of only one kind of atom

11. Negatively charged particles

13. Represents elements

14. The smallest unit of a compound
