

Name: _____

Date: _____

Chemistry

Across

5. Process used in finding unknown concentration
 7. Electro chemical cell that derives electrical energy
 10. A reaction of ester and water
 11. When solution is oxidized
 12. A family contain double bond

13. Material used in titration

14. Any substance undergoing analysis
 16. Molecule with 7 carbons
 17. To increase rate of reaction

Down

1. Reaction you add Two Cl
 2. Solution undergoing reduction

3. Example of galvanic cell

4. To complete the circuit of danial cell
 6. How to know that the titration ends
 8. First family in organic chemistry
 9. how we measure a a solid solution
 15. A family with 2 oxygens
