

Chemistry & Cells

Across

2. backbone of fat molecule

6. atom carrying a charge

8. made of neutrons+protons+electrons

9. molecule from DNA code

11. chart of all elements

12. fatty acid with Hs on opposite sides

14. energy is released

15. energy is absorbed

Down

1. energy hill to make reaction go

3. protein assembly message

4. coiled DNA

5. organelle holding DNA

7. particle with 1 positive charge

10. particle with almost no weight

13. organelle that makes proteins
