Date: \_\_\_\_\_

# Circle of life

## Across

- 2. The thing that contains and stores chlorophyll
- 4. Oxygen+Glucose=
- 7. A reaction that catches energy from the sun
- 9. CO 2
- 15. Sugar
- 17. A series of protein that is made of electrons
- 19. The little hole in between the guard cells
- 21. a molecular compound that is a product of Cellular respiration
- 24. Carbon Dioxide +water+ energy=Glucose+oxygen

## 25. Breaking down of glucose

### Down

- 1. Dark reaction
- 3. The basics for all living things. moist.
- 5. The energy that plants use to photosynthesize
- 6. The powerhouse of the cell
- 8. a chemical reaction that makes oxidation happen
- 10. Ingredients to make products
- 11. Absorb sunlight with CO 2 and water creates food for the plant

12. A living multicellular organism that goes through photosynthesis

13. A consumer that only does respiration

14. Flat green pancakes

16. adenosine triphosphate

18. The formula for glucose

20. A compound that we breathe

22. Things that come out of a reaction

23. The ability to do work
