

# Circles Vocabulary

## Across

5. A line or segment that is tangent to two coplanar circles.

9. Coplanar circles that intersect at one point.

10. A segment whose endpoints are the center and any point on a circle.

11. Part of a line that has a fixed starting point but no end point.

12. The set of all points in a plane that are equidistant from a given point called the center of the circle.

13. A long, narrow mark or band.

## Down

1. A line in the plane of a circle that intersects the circle in exactly one point.

2. Coplanar circles that have a common center.

3. The point where the tangent intersects the circle.

4. A segment whose endpoints are on a circle.

6. A chord that contains the center of the circle.

7. A part of a line that is bounded by two distinct endpoints.

8. A line that intersects a circle in two points.
