

Climate

Across

- 1. Direction wind bends in northern hemisphere due to Coriolis Effect
- 6. Found around 0° latitude
- 7. Cell with the coldest air
- 9. Air pressure found at 30° N & S latitude
- 10. This is lacking between cells
- 11. Cell found near the equator
- 17. Moving much faster than the poles, causing the Coriolis Effect

Down

- 2. Affects wind, oceans, planes, etc. (2 words)
- 3. Causes deserts on leeward side of mountains (2 words)
- 4. Cell where surface air flows toward the poles
- 5. Latitude where deserts are located (2 words)
- 8. Primary reason for climates location
- 12. # of cells that transport energy from equator to poles
- 13. Winds that flow the same direction over the long term
- 14. Air pressure between Ferrel & Polar cells
- 15. Found between cells with different temperatures (2 words)
- 16. Long term average of conditions for an area
- 18. Climate found near coasts
- 19. Climate with extreme temperature swings
- 20. Always present around the equator due to low pressure
