

Climate Change

Across

4. atmospheric disturbance resulting in severe weather

8. formed as result of freezing precipitation

10. produced by burning fossil fuels

12. fossil fuel used to power motor vehicles

14. overflowing of large amount of water beyond normal confines

15. collected in Antarctica and Greenland

16. covers 12% of the world's oceans

17. converts chemical energy into electricity

18. energy generated and stored in the earth

Down

1. released by animals and termites

2. cleanest of fossil fuels

3. prolonged period of excessively hot weather

5. device that converts light into electricity

6. converts kinetic energy into electrical energy

7. formed by anaerobic decomposition of buried dead organisms

9. dirtiest of fossil fuels

11. period of below-average precipitation

13. conversion of sunlight into electricity
