

Climatology

Across

2. The scientific study of climate
4. Which part of the atmosphere does the weather take place in
7. A mixture of gases that we breathe
11. Ultimate source of energy in the earth
13. What shape is earth
14. Where does man exist
16. The state of the atmosphere currently

18. The evaporation of moisture from the aerial parts of plants
20. Made up of rocks, soils, sand and grit

Down

1. The place where you find lakes, the ocean and rivers
3. The term given to moisture that falls from the air to the ground
5. The condensed moisture of the atmosphere falling in separate drops
6. What element that we use a anometer to measure it

8. What instrument we use to measure pressure

9. What element is measured with a hydrometer

10. A measure of hotness and coldness in degrees

12. The amount of water held between the earth, seas and the atmosphere is constant

15. What number channel do you find the weather channel

17. The movement of air masses from high pressure areas to low pressure areas

19. What is the unit of measurement for pressure
