

Clothing Basics

Across

2. Made from plant and animal products (cotton, linen, silk, wool)
 4. When you _____ or mix and match pieces of your wardrobe, you can create additional looks
 5. Manufactured from substances such as wood pulp and petroleum (rayon, nylon, polyester)
 8. Made by interlacing lengthwise and crosswise yarns
 10. Some fabrics may require to be _____ or ironed after each wash
 11. This happens when electricity builds up in the dryer and clothes stick to itself or to your body.

13. Direction the threads run in fabric

14. When two or more fibers are combined to create a fabric
 15. This is when you apply a stain remover before laundering
 16. A trademark used by a manufacturer to identify its products
 17. A shopping plan is a _____, or way to prepare, for spending the money you have available to buy clothing you need or want.
 18. This creates a smooth, shiny surface used for blouses and formal wear.

Down

1. This is made by looping threads together (stretchy)
 3. These are made from tiny strands
 6. This is the simplest weave used in shirts and sheets
 7. This creates diagonal lines on fabric often found in denim fabrics
 9. Work hard and pay attention to details
 12. A fabric witch will keep its original color through many washings.
