# Cognitive Development Theory

Across

7. Who made the theory of Cognitive Development

8. What is the way we deal with new information by either modifying our previous ideas or making completely new ones?

9. When children deal with new situations based on existing schemes

10. What is a state of being able to address new events based on existing schemes?

Down

1. At what stage do children have adult-like reasoning with more concrete, real-life situations?

2. In what stage can children not think about something that isn't directly in front of them?

3. What is the final stage of cognitive development where children can use logic for abstract as well as concrete ideas?

4. In what stage can children think about more of the world around them but cannot use logical thinking like adults?

5. What theory explains how children shape their ideas of the world around them?

6. What are the organized facts about a specific phenomena or idea?
