

Name: _____

Colorado 14ers

Across

- 4. 3rd highest peak and one of the Collegiate range
- 5. Features complex terrain that has misled climbers in the past, contributing to deaths in the summer of 2006.
- 7. Due to an awful scree field located on the standard route, this 14er is usually only climbed by those wishing to climb all of Colorado's fourteeners.
- 10. Barely qualifies as an independent peak by the standard 300 foot prominence rule.
- 11. Routes up this mountain involve difficult route finding, high exposure, and a great deal of loose rock. They are some of the most difficult and dangerous of all of the standard routes on the Colorado fourteeners.
- 12. You'll face a conundrum at one of the sub-summits of this 14er in the Elk Mountains.
- 14. A 14er in the San Juan range lying near Lake City.
- 15. The second highest of three peaks located around the cirque known as Upper Chicago Basin.
- 21. Don't be perplexed uncertain when climbing this tallest peak in the Tenmile Range.
- 27. Not small, for sure!
- 29. Prized for gemstone deposits (aquamarine), this is the highest peak in the Sawatch Range.
- 30. First climbed on July 17, 1877 by William Libbey, a professor of physical geography at the school this mountain was named after.
- 31. Named by a team from another university that chose their school for the taller of the two peaks.
- 32. Named in honor of an early pioneer of mountain climbing in the Western United States and in Colorado in particular.
- 38. The only non-technical route up this peak is the Northeast Ridge or "Knife's Edge."
- 41. Named for the distinctive cross-shaped snowfield on its northeast face.

Down

- 1. Named after the Wyandot people.
- 2. Named for an English University and lies just north of Mount Belford.
- 3. The only Colorado 14er named for another U.S. State.
- 6. Ranked as one of the ten most difficult ascents for Colorado 14ers. This "mount's" namesake did it the hard way.
- 8. The least challenging climb of the Crestones. The standard route on the peak is an exhausting hike along a trail, with rock scrambling (Class 2) near the summit.
- 9. The name of this mountain means, 'People of Sun Mountain.'
- 13. Highest summit of the Needle Mountains range.
- 16. "Honestly," any Illinois lawyer would love this mountain.
- 17. Named in 1987 to honor seven dead explores of another kind.
- 18. Apparently, not all clouds in Colorado are white.
- 19. Named for a precious metal common to the Colorado mountains.

- 20. Funny that this mountain is nearest to one named for a republican president.
- 22. Named for Colorado Territory Governor of 1874.
- 23. Named for an Icelandic volcano.
- 24. While this 14er has little more than the minimum 300 feet of prominence to qualify as a separate peak, it is notable for being one of the most technically difficult and dangerous of the fourteeners to climb.
- 25. Can be prominently seen from Longmont, Colorado.
- 26. The Ute Indians might not drink the water on this San Juan peak :-)
- 28. Named in honor of an American Civil War general, this 14er is the only one that has had a successful aircraft landing on its summit.
- 33. The highest summit of the La Garita Range.
- 34. Rises 7,000 feet above the Eastern side of the San Luis Valley. One of two peaks using this word in their name.
- 35. Skip the anatomy on your way to this summit.
- 36. Snow White would love this peak
- 37. Named for the large snowfield that lies on its eastern slopes.
- 39. Because it is generally considered an easy climb, along with its accessibility from nearby Denver, this mount is one of the most popular mountains to climb in Colorado.
- 40. The image of an angel emerges on the east face of this mountain during snow melt each spring..[
- 43. Originally known as Old Baldy.
- 46. Composed of a characteristic pink granite.
- 47. Botanist Charles Parry named this peak after his friend and college John _____.
