# Common Lab Equipment

## Across

3. Measures volume of liquids in mL

8. Worn to protect your most vulnerable organ

12. Similar in appearance to tweezers; used to pick up small items

13. Produces an open gas flame

16. Used (with a clamp attached) as a support for other apparatus

17. Delivers gas to the Bunsen burner

## Down

1. Measures weight

2. Supports other apparatus over the Bunsen burner

4. Angled-bottom reaction vessel

5. Used to crush solids into a powder or paste

6. Helps in pouring liquids by directing liquid flow

7. Round-bottom reaction vessel

9. Commonly used cylindrically shaped reaction vessel

10. Used to disperse the heat of a flame

11. Delivers liquid one drop at a time

14. Vessel used to heat solids to an extreme temperature over an open flame

15. Measures mass
