

Computer and Theoretical Models

Across

3. What has computer models helped to develop?
7. Second concept used by computer models
8. One concept used by computer models
9. One primary way to study internal processes
10. What does it suggest the mind is similar to?

Down

1. Another primary way to study internal processes
2. One important theoretical model
4. The sequence of storage
5. The system the information goes through, according to the theoretical method
6. Third concept used by computer models
