

Name: _____

Coordinate Geometry Review

Across

4. The point halfway between two points.

8. Two lines where the slopes are the opposite reciprocals of each other.

9. $y=0$

11. $a^2+b^2=c^2$

12. The four sections of the coordinate plane.

13. $Y=mx+b$

Down

1. Where the line passes through the y-axis.

2. Where the lines passes through the x-axis

3. Square root of (a^2+b^2)

5. (x, y)

6. Two lines with equal slope.

7. (Rise)/(Run) or the measure of the steepness of a line.

10. $x=0$
