# Correlation Match Up

1. What do correlations look for?
  2. What are you comparing to find a correlation?
  3. What is a correlation coefficient?
  4. What is the range of coefficient ?
  5. A coefficient of +1 is ...
  6. A coefficient of -1...
  7. A coefficient of 0...
  8. The sign + and - tells us the...
  9. The number after the sign tells us?
  10. A coefficient of +0.5 is a
  11. The coefficient of -0.7 is a
  12. What doesn't there have to be for a correlational relationship to be found
- A. Negative
  - B. A positive correlation
  - C. Relationship
  - D. -1 to +1
  - E. The strength
  - F. Co Variables
  - G. How close variables link
  - H. No correlation
  - I. Weak negative correlation
  - J. IV and DV
  - K. Strong positive correlation
  - L. Direction of relationship
