

# Cranial Nerves

## Across

5. Medulla contains many of these

7. Related to taste, swallowing and salivation

8. lies directly superior to the medulla and anterior to the cerebellum

9. extends from the pons to the diencephalon

10. a mass of nerve tissue located in the vertebral canal

11. bundles of myelinated and unmyelinated axons located in the brain and spinal cord

12. Cochlear nuclei in the medulla

## Down

1. the most inferior part of the brain stem

2. origin for nerve impulses

3. Control tongue movement

4. a large oval opening in the occipital bone

6. areas in the CNS and ganglia containing neuronal cell bodies and more
