

Cranial Nerves

Across

2. If I touched my top lip, which nerve and branch would detect the sensation?

4. The only cranial nerve to pass through jugular foramen that has purely motor modality

7. Cranial nerve that provides both special and somatosensory innervation to posterior 1/3 of the tongue

8. Only muscle receiving motor innervation by Glossopharyngeal (CNIX)

9. The trapezius and _____ muscles are innervated by CNXI

11. Provides motor innervation to intrinsic tongue muscles

14. Type of information (modality) transmitted by CNVI

15. Cranial nerve providing motor innervation to the Lateral Rectus Muscle of the eye

16. The cranial nerve headed to the eye that does NOT pass through the superior orbital fissure

17. Sole muscle innervated by CNIV

19. Cranial nerve responsible for somatosensory innervation of the face

20. Only muscle innervated by Abducens

21. Provides innervation to hearing and balance organs

Down

1. Cranial nerve that provides special sensory innervation to anterior 2/3 of the tongue

3. Innervates sphincter pupillae (as well as others) of the eye

5. Cranial nerve that provides motor innervation to the majority of the pharynx muscles

6. Nerve and branch responsible for somatosensory innervation of the anterior 2/3 of the tongue (full branch name)

10. Cranial nerve that passes through the cribriform plate of the ethmoid bone

12. Cranial nerve innervating Superior Oblique Muscle of the eye

13. What is the special sense innervated by Facial nerve?

18. Modality of CNVIII
