# DNA

## Across

- 1. producing two identical replicas of DNA
- 6. the sides of the DNA ladder composed of sugar and...
- 8. where DNA is stored
- 9. always pairs with cytosine
- 10. the two sides of DNA held together by weak...

- 11. composed of a sugar, a base, and a phosphate

## Down

- 2. the shape of DNA
- 3. discovered the chemical structure of DNA
- 4. The sugar found in DNA
- 5. always pairs with thymine
- 7. a section of DNA that codes for a specific trait
